

Japanese Maple Variety Sheet

Variety	Size	Description
Oshio Beni	15'-20'-x18'	The bright red new growth turns burgundy in mid-late summer and is followed by bright scarlet fall color. It has palmate leaves and a graceful arching form. It's name means "red tide". Zone 5.
Emperor I	10' x10'	This tree has an upright growth habit with deep red palmate leaves that will hold in the heat. It develops a broad shape with age. Brilliant crimson fall display. Zone 6
Tamukeyama	8' x 12'	A laceleaf weeping Maple that has deep purple to red foliage. It holds its deep color through the heat of the summer, turning bright red in the fall. Zone 5.
Ryusen	6'-8' x 6'	This weeping form has pendulous branches with green palmate leaves. It has a blazing orange-red fall color. Perfect for small spaces. Zone 5.
Red Filigree	4'-5' x4'-5'	Finely cut lace-leaves adorn this strongly weeping Japanese Maple. New leaves are deep red with a crimson fall color. Great accent plant. Zone 5.
Crimson Queen	10' x 10'	This heat-resistant Maple maintains its dark purple to red foliage through the summer. Leaves are deeply dissected. Fall color runs an array of scarlet tones. Zone 5.
Dragon Tears	5'-10' x 6'-8'	Crimson-red new growth turns burgundy in the summer, then rusty-red in the fall. It has a strong branching habit with pendulous branch tips. Zone 5.
Aconitifolium	8'-12'	This is an upright grower with deeply dissected, fern-like green leaves. Fall color is striking, with brilliant scarlet tones which sometimes turn various shades of ruby-crimson. Zone 5.
Coral Bark	20'-25' x 15'-20'	This large Japanese Maple with coral-red to salmon bark gives a striking contrast in winter. The palmate new growth is yellow-orange, turning to green in the summer. Brilliant yellow-gold fall color. Zone 5.

Green Lace	10'-12' x 3'-4'	This cascading form turns into a dome-shaped tree. New deeply-dissected leaves are bright green with yellow-gold, followed by a bright crimson in the fall. Zone 5.
Red Pygmy	8' x 6'	This slow-growing grafted Japanese Maple forms a compact tree with a broad round shape. The leaves come out maroon in the spring and hold their color through early summer. The narrow, bamboo-like leaves darken in summer and fall color is a brilliant yellow-orange. Zone 5b.
Orangeola	12'-15' x 4'-6'	This tree has arching branches with dissected leaves that turn from green to purple to a brilliant orange in the fall. It is a real stand-out as a specimen or as an accent plant, and a great contrast against green-leaved plants. Zone 5.
Horyoku	10'-12' x 6'-8'	Shiny-green star-shaped palmate leaves remain green through the summer and turn yellow-orange in the fall. It is fast growing and heat tolerant. Its name means "jewel". Zone 6a.
Rhode Island Red	12' x 12'	Bright red palmate leaves emerge in the spring and darken as they age. A very nice dwarf selection with a broad upright form. Fall foliage is orange to red. The dark red stems stand out in the winter months. Zone 5.
